STEP-03: Update the App.java with new palindrome code

```
package com.example; public class App

{   public static void main(String[] args)

{

    String str = "madam";

String rev = "";    for (int i = str.length()

- 1; i >= 0; i--) {        rev = rev +

str.charAt(i);

    }    if

(str.equals(rev)) {

        System.out.println(str + " is a Palindrome");

    } else {

        System.out.println(str + " is not a Palindrome");

    }

}

}
```

STEP-04: Again, build the image

```
C:\Users\narut\docker-maven2\docker-demo>docker run docker-demo:1.0-SNAPSHOT
madam is a Palindrome
C:\Users\narut\docker-maven2\docker-demo>
```

STEP-05: Run the container output will be there
